

RE: MB Docket No. 15-149

Tom Wheeler, Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Chairman Wheeler,

The York Chamber of Commerce includes more than 365 members committed to helping existing businesses grow and attracting new employers to the area. York has an excellent public education system, and is home to York College as well as several major manufacturing, agricultural and logistical employers. The common thread for students, businesses and residents in York is the need for better technology and high speed internet connections.

York is located in rural Nebraska, and the importance of expanding our broadband infrastructure to augment business development cannot be overstated. We are pleased to learn that New Charter is planning to invest at least \$2.5 billion to expand networks into new commercial areas.

Charter Communications has been a leader in providing affordable high-speed internet, and New Charter will ensure that even more people can benefit from their commitment. The company will offer Charter's minimum broadband speed of 60 Mbps to Time Warner Cable customers nationwide and in York at a more affordable rates.

New Charter will be an important addition to the broadband marketplace, and will help rural communities like York stay connected to the latest technologies. We ask you to please approve this merger.

Sincerely,

A handwritten signature in blue ink, appearing to read "Madonna Mogul". The signature is fluid and cursive, with a large, stylized "M" and "Mogul" written in a similar style.

Madonna Mogul, Executive Director
York Area Chamber of Commerce
